PROFESSIONAL SUMMARY

Experienced Full Stack Developer having 4 plus years of experience in building scalable web applications. Skilled in Java, Spring Boot, and JDBC for backend development, with strong proficiency in React and Material-UI for creating clean, user-friendly interfaces. Known for writing maintainable code, solving complex problems, and contributing effectively in collaborative, agile environments. Committed to continuous learning and delivering high-impact solutions.

SKILLS

Frontend: React.js, Angular, JavaScript, HTML5, CSS3, Material-UI

Backend: Java, Spring Boot, Microservices, REST APIs

Databases: PostgreSQL

DevOps : Git, CI/CD

TOOLS

Eclipse | IntelliJ | Visual Studio | Sublime Text

WORK HISTORY

Software Engineer-1, 07/2021 - Current

AMPS Health Care Private Limited – Hyderabad, India

Project: Intelligent Policy Update (IPU)

TechStack : Java, Spring Boot, React Js, PSQL

Project Overview :

The Intelligent Policy Update (IPU) system is designed to streamline the processing of health insurance claims by automating the evaluation of claim components against U.S. healthcare norms and policies. This reduces manual intervention and ensures efficient handling of high-volume claim transactions. The platform supports seamless policy updates and validations through a fully automated backend process.

Key Contributions:

- Migrated the application from Angular to React Js, significantly improving page load times performance.
- Developed dynamic and interactive user interfaces in React Js to display and manage claim related information.
- Worked on third-party applications such as OneDrive and Dropbox to enhance component and user accessibility.
- Collaborated with project managers, developers, QA teams, and end users to troubleshoot a technical issues effectively.
- Developed reusable components that significantly reduced development effort on multiple c
- Improved software performance by identifying and resolving bottlenecks in the code.
- Designed and implemented API's and backend services to support claim data processing and

- interaction with the policy engine. Implemented features to export processed claim and policy data
- into Word documents for reporting and documentation purposes. Implemented CI/CD pipelines for automated builds and deployments triggered on repository changes. Configured CI/CD pipelines to run on every commit, ensuring faster and reliable deployments.”
- Developed scalable and maintainable code, ensuring long-term stability of the software.

ACCOMPLISHMENTS

- Monthly Performance Award – 2023
Received for consistent contribution and strong performance across project deliverables.
- Recognition Award – 2024
Awarded for code optimization and enhancing overall application efficiency.

EDUCATION

Bachelor of Science: Computational Science, 08/2020
GITAM UNIVERSITY- Visakhapatnam, India
